Experience

05/2023 - today
Warehouse operative • Goods-in Support • Keeling's Logistics

Currently trained as a goods-in operative, goods-in support and forklift operator. At the goods-in support role, I manage approximately 370 grid locations at the +1 degree environment and 10 goods-in bays, also, support goods-in manager, goods-in and assembly staff with exceptions, assignment issues and any related problem that could interfere with goods-in or assembly layouts workflow.

04/2021 – 04/2023
Warehouse operative • Goods-in operative • Keelings's Logistics

02/2019 – 03/2021
Warehouse operative • Assembler • Keeling's Logistics

Key skills

C#, ASP, WPF, Windows Forms, .NET framework, SQL, MSSQL, NoSQL, MongoDB, GIT, HTML, CSS, JavaScript, Node.js, React.js, Next.js, Python and PHP, Wordpress.

Projects

Fonsecar - Currently working on the third version of car shop web app using React.js, Next.js and Tailwind.css. The aim of this project is to practice my skill creating a fully resposive web page, and to explore the new version of Next.js 13.

Bank app – Coded in C# and WPF on the .Net framework as part of a class project. This app includes the fundamental

functions needed to operate a bank, including cryptography, users and administrators transactions logs. Everything connected to a MSSQL database.

College Management System – in this class project, I coded an application that can be used to administer staff, students, classes and grades. C#.Net and Windows Forms on the .NET framework, MSSQL database was used in this assignment.
