Objective

I am currently seeking a internship or placement position to put my skills in practice, gain experience and advance on my carreer. I am enthusistic to be part of a team to work on new applications and/or mantaining projects already in production.

Experience

05/2023 - today
Warehouse operative • Goods-in Support • Keeling's Logistics

Currently trained as a goods-in operative, goods-in support and forklift operator. At the goods-in support role, I manage approximately 370 grid locations at the +1 degre invironment and 10 goods-in bays, also, support goods-in manager, goods-in and assembly staff with exceptions, assignment issues and any related problem that could interfere with goods-in or assembly layouts workflow.

04/2021 – 04/2023
*W*arehouse operative • Goods-in operative • Keelings's Logistics

02/2019 – 03/2021
Warehouse operative • Assembler • Keeling's Logistics

Projects

Fonsecar - Currently working on the third version of Car shop web app using React.js, Next.js and Tailwind.css. The aim of this project is to practice my skill creating a fully resposive web page, and to explore the new version of Next.js 13.

Bank app – Coded in C# and WPF in the .Net framework as part of a class project. This app include the fundamental functions needed to operate bank, including cryptografy and record of users, administrators and transactions history in a MSSQL database.

College management system – in this class project, I coded a college management application that can be user to administer staff, students, classes and grades. C#.Net and Windows Forms in the .NET framework, MSSQL database were used in this assignment.
